

## ProScan moisture meter

**Proscan is a non-invasive pinless moisture meter** for industrial and kiln workers who want to quickly find moisture in timber.

The non-invasive wood tester is made in the USA and uses radio frequency signals to quickly scan lumber and in addition drywall, concrete or other building materials without damaging the sample. Its built-in species corrections for woods with a specific gravity of between .30 and .80, checking a variety of wood species is a cinch.

With ProScan professionals can work with confidence, save time, stay on budget and avoid call-backs.

### Your Benefits:

- Handheld, compact, lightweight
- Easy-to-read digital display
- Quickly scan large areas to find moisture hot spots
- Calibrated to minimize false high readings
- Built-in battery/calibration checks
- Adjustable alarm alerts you when a preselected moisture level has been reached, allows the user to easily compare readings against an established dry standard
- Advanced RF technology makes it easy to quickly sweep large areas and locate high-moisture spots
- Hold function makes taking readings in hard-to-reach places fast and easy
- Built-in species corrections over the range of .30-.80 SG
- 0-100 reference scale for non-wood building materials
- Measures %MC on wood over the range of 5%-30%
- Rugged sensor pad measures without damaging the sample
- RF signal penetrates for moisture up to 19-25mm (¾"-1") deep
- Operating Temperature: -20°C to +70°C
- Size: 14x8,5x3cm (5½"x3¾"x1¼")
- Weight: 241gr. (8.5 oz.)
- One 9-volt battery included
- Rugged carrying case
- 1-year warranty
